

Docket No. N2012-1

PUBLIC REPRESENTATIVE REFERENCE N2012-1/2

PREFACE

This library reference starts with USPS-LR-N2012-1/15, LogicNet Model Workbooks, and makes changes to model the current service standard and operating windows within the LogicNet software.

This library reference has three files in its root folder. The first one is the public counterpart to PR-LR-N2012-1/NP1; it contains the FY2010 workload volume. The other two files are the Microsoft Excel templates containing the data to load the scenarios into the LogicNet software.

FY2010 MODS PR-LR-N2012-1_2.xls

This file contains the FY2010 workload volume from USPS-LR-N2012-1/13. This Excel workbook consists of the same worksheets as USPS-LR-N2012-1/13.

LogicNet_Scenario1.xls

This file is a Microsoft Excel template containing the data to load optimization scenario "Alternative #1" into the LogicNet software. It also contains the results of the optimization in the worksheets "FacilitiesOpenedPlantRpt", "PlantDetailRpt", and "TransportationP2CRpt".

LogicNet_Scenario2.xls

This file is a Microsoft Excel template containing the data to load optimization scenario "Alternative #2" into the LogicNet software. It also contains the results of the optimization in the worksheets "FacilitiesOpenedPlantRpt", "PlantDetailRpt", and "TransportationP2CRpt".
